Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23, 27-30 and 32-38, drawn to a plastid transformation vector encoding insulin-like growth factor, a method of using it to express IGF in plants, and plants transformed with it.

Group II, claim(s) 24-25 drawn to insulin-like growth factor-1 and a composition comprising it.

Group III, claim(s) 26, drawn to interferon IGF-1.

Group IV, claim(s) 31, drawn to a plant whose plastid expresses interferon.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-IV appears to be a human hormone.

However, Rotwein (1991, US Patent 5,070,075, cited in the search report) teach a human hormone, insulin-like growth factor-1 (Fig 2). Thus, claim 24 among others, is not novel.

Therefore, the technical feature linking Groups I-IV is not special and the Groups are not so linked under PCR Rule 13.1.

Art Unit: 1638

Applicant is advised that for the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
